Physica corporis humani, CLXXIX, 695.

Istiusmodi operis partis analysim damus ut clare videatur ope istiusmodi Tabulæ in isto tempore status scientiæ physiologiæ humanæ.

Corpus humanam. — Omne corpus animale terra formatum est, id est ex quatuor compositum... Quatuor sunt elementa ex quibus constat; nunquidque autem elementorum una tantum contentum est qualitate; ignis caliditate, aer humiditate, aqua frigiditate, terra siccitate. Secundum Hippocratem, si corpus animale ex uno constaret elemento, nunquam doleret; quia non esset unde doleret, unum existens; sed elementa corrumpuntur, et hoc modo fit corruptio... Videndum unde corpori quatuor humores nascuntur, vel nutriuntur. Omnis cibis sumptus ex quatuor constat elementis: sed quam multipliciter et dissimiliter in eis quas vesci possunt, natura elementorum se habet secundum caliditatem et frigiditatem siccitatem et humiditatem liber graduum demonstrat. Cum igitur cibis accipitur, os primum adoptat illum in subiles et minutas partes cum dentibus et lingua... Sic preparata esca transmittitur stomacho per guttur et merum... Est autem meris membrum longum et rotundum et concavum, et intus villosum, habens introrsum pilos longos, alios in transversum, alios sursum ad os directos. Pilisursum directi naturaliter cibum attrahunt, qui vero in transversum, stringunt. Stomachus duo habet ora, alterum superius, alterum inferius. — Superius enim os stomachi, accepto cibo, clauditur donec digeratur. Deinde retinens quod suis aptum nutrimentis invenit, cætera, porta inferiori aperta, egerit in inferiora. Operator autem hæc stomachus per quatuor virtutes quæ sunt et naturales, appetitivam, contentivam, digestivam, expulsiivam: quibus virtutibus non caret præsertim cerebrum, propter animale, vel sensualem virtutem, cor propter spirituale, epas propter naturalem, genitalia propter generativam virtutem... Inferiores sub stomacho intestini non carent. Quæ per inferiorem portam egerunt, suscipit duodenum intestinum; quod sic vocatum est, quia ad mensuram est duodecim digitorum. Statim cum facta est digestio, et per digestionem rei digestæ alteratio, sequitur eorum quæ feculentia sunt egestio. Suscipiunt et alia intestina quæ egeruntur, tria subtilia superius, circa os stomachi, tria grossa inferius. Est autem inferius intestinum unum subtile vocatum, in quod cum descendit quod egestum est, aliquandiu ibi immoratur, donec ibi secunda quadam digestionem melius succus ille depuratus et subtiliatus, per venas quas dicunt mesaraicas, quod subtile est et purum, remittit ad epas. Epas prædictum succum suscipiens per venas prædictas, et eam quæ dicitur porta, in sui naturam transmutat, iterum digerendum. Quidquid enim in eo igneum est, ad nutrimentum sui assumit cholera rubra; quidquid acreum, sanguis; quidquid aquosum vel humidum, flegma; quidquid grossum et terrenum, melancholia. Sic igitur humores quatuor in epate creati, et ab epate in totum corpus distributi, si secundum rectam naturæ regulam incedunt, quamvis diversæ sint qualitates, unam tamen formam operantur sanitatis, invicem cooperando, invicem se adjuvando... De digestionem etiam ista fumus ascendens lenis et suavis, molliter tangit cerebrum, et ventriculos ejus opprimit, in tantum ut omnes ejus actiones sopiat; hic est somnia. In quo, cessantibus, omnibus animæ virtutibus, sola viget virtus naturalis... Primum cibi in medio stomachi albi efficiuntur, id est flegmatici; circa inferiora prope epas quasi sanguis aquosus; decoctus in epate sanguis; plus decoctus cholera rubra; nimis decoctus cholera nigra. (*Sequuntur alia hujusmodi ad hominis physiologiam attinentia.*)

INDEX

DE VESTIBUS SACERDOTALIBUS, MONASTICIS ET LAICALIBUS,

QUORUM FIT MENTIO IN PATROLOGIA,

EXPONENS MYSTICAM ILLORUM SIGNIFICATIONEM.

PARS PRIMA.

De vestimentis Summi Pontificis et sacerdotum in Veteri Testamento.

1. Femoralia linea, sive feminalia quæ usque ad genua et poplites fluunt ad tegenda sacerdotis verenda, braccæ quoque vocantur. — 2. Tunica byssina talaris, corpori adherens, cum strictis manicis, et usque ad crura descendens; nulla ruga in ea esse debet, in militibus eadem camisia vocatur. — 3. Balteus, seu cingulum, vel zona, textitur sub tegmine cocci, purpure, hyacinthi et stamine byssino ac polymita arte distinguuntur. Tunicam lineam inter umbilicum et pectus stringit balteus. — 4. Pileolus rotundus; a Græcis tiara, a nobis vero, galerus vocatur, non habet acumen in summo et byssinus est.

Hæc sunt vestimenta communia sacerdotum et summi pontificis, sequentia vero propria sunt summi pontificis. 1. Tunica talaris, apud Hebræos, *mail* dicta, tota hyacinthina, habens manicas ejusdem coloris et superiori parte aperta qua collo induitur. Ad imam partem pendent duo et septuaginta tintinnabula totidem malis punice intermixta, ut ingrediens ad Sancta sanctorum pontifex totus vocibus incedat, statim moriturus nisi hoc faciat. — 2. Ephod, id est superhumale, quatuor coloribus, scilicet, hyacintho, bysso, cocco, purpura, et ex auro contextum. Contra pectus nihil textitur, ut locus Rationalis relinquatur. In utroque humero habet singulos lapides strictos auro quorum in singulis sexa patriarcharum nomina sunt, ut Sancta sanctorum ingreditur pontifex nomina populi pro quo rogaturus est in humeris portet. — 3. Theraphim, seu logion, quod rationale vocamus, est pannus brevis ex auro et quatuor coloribus textus, habens magnitudinem palmi per quadrum. Intexti sunt ei duodecim lapides pretiosissimi per quatuor ordines. In singulis lapidibus secundum ætates, duodecim tribuum nomina sculpta sunt. Per quatuor rationalis angulos, quatuor annuli sunt auri quibus adnectitur super humeris vittis hyacinthis catenisque aureis. — 4. Lamina aurea in qua scriptum est ineffabile Dei nomen quatuor litteris hebraicis. *Jod, he, vav, he*, id est *Jehovah*. Hæc super pileolum lineum et commune omnium sacerdotum, in pontifice plus additur, et in fronte vitta hyacinthina constringitur, totamque pontificis pulchritudinem, Dei vocabulum coronat et protegit, S. Hieronymus, XII, 613.

Octo sunt vestimenta sacerdotalia Veteris Testamenti. — 1. Podaris, vestis linea corpori stricta, usque ad pedes descendens, quæ vocatur etiam camisia. — 2. Abaneth id est cingulum, polymita arie ex cocco, purpura, hyacintho contextum ita ut flores, gemmæque in eo viderentur distinctæ. — 3. Pileum ex bysso rotundum, caput tegens sacerdotis, in occipito vitta constrictum, hoc Græci, et nostri tiaram, vel galeriam vocant. — 4. *Mail*, id est tunica talaris, tota hyacinthina habens ad pedes 72 tintinnabula totidemque intermixta mala punice. — 5. Ephod, pallium superhumale ex quatuor coloribus et auro contextum, habens in utroque humero duos smaragdos auro conclusos in quibus erant sculpta nomina patriarcharum. — 6. Logion, id est rationale, pannus duplex, auro et quatuor textum coloribus, habens magnitudinem palmi per quadrum, cui per quatuor ordines intexti erant xii lapides pretiosissimi in singulis quarum insculpta duodecim patriarcharum nomina. — 7. Petalum, seu lamina aurea in fronte pontificis posita quæ nomen de tetragrammaton Hebræis litteris habebat scriptum. — 8. *Budim*, seu femoralia, id est Græcæ lineæ usque ad genua pertingentes quibus vered unda sacerdotis velabantur, S. Isidorus, LXXXII, 684 seqq.

Apud Ven. Bedam eximia exstat descriptio atque mystica interpretatio Vestium sacrarum antiquæ legis. Istæ autem sunt: rationale, pectoris habitus; superhumale, humeros cooperiens; tunica interior, linea vel byssina; tiara byssina, seu cidaris, lamina aurea in fronte posita; balteus, seu cingulum, femoralia. Ex his octo vestimentis, quatuor sacerdotibus minoris ordinis concedebantur; femoralia videlicet, linea stricta vestis, balteus et cidaris. Cuncta autem fiebant de auro, pretiosis lapidibus eximisque coloribus, quia nihil vile aut sordidum, in sacerdotis ore, vel opere debet apparere, sed cuncta quæ agitur, universa quæ loquuntur, omnia quæ cogitant et coram hominibus præclara, et in conspectu interui arbitri oportet, esse gloriosa, Ven. Bedæ, XCI, 464.

Erant autem octo species vestium sacerdotalium in Veteri Testamento, scilicet: tunica linea, tunica hyacinthina, superhumale, rationale, cidaris, balteus, seu cingulum, lamina aurea in fronte Pontificis et feminalia minoris vero ordinis sacerdotibus, quatuor tantum licebat uti: tunica linea stricta, cidari, balteo, et femoralibus. (Vide fusiuss apud auctorem ipsum.) Alcuinus, CI, 1238 seqq.

Rabanus Maurus recenset indumenta pontificis ac sacerdotum Veteris legis, jam a nobis supra pluries exposita, CXI, 568. — Exponit quoque variarum aliarum vestium nomina et origines de quibus dicemus infra ad Isidorum Hispalensem, LXXXII, 685.

Descriptio et mystica significatio sacrarum vestium in Veteri et Novo Testamento, Ivo Carnot., CLXII, 524. seqq.

Octo sunt vestimenta pontificis apud Hebræos, scilicet: tunica byssina, zona, tunica hyacinthina, e qua pendent 72 tintinnabula aurea totidem malis granatis intermixta, superhumale seu ephod, rationale seu logion, mitra, sive tiara, aut cidaris, lamina aurea et femoralia, Hugo a S. Victore, CLXXV, 434.

Eadem quam supra exponit hic auctor consulendus est, Thomas, Cisterciensis monachus, CCVI, 663 seqq.

Quatuor erant indumenta legalia tam minoribus sacerdotibus quam principi sacerdotum communia: 1^a femoralia de byssorelorta contexta; 2^a camisia, seu linea subcula byssina et duplex; 3^a balteus, quatuor digitis latus, contextus de bysso, cocco, purpura et hyacintho; 4^a tiara, seu infula, aut cidaris, formam quasi rotundæ cassidis representans.

Propria vero pontificis ornamenta erant: 1. Tunica hyacinthina, id est poderis, seu talaris vestis ex qua pro fimbriis pendebant malagranata cum tintinnabulis duo et septuaginta interposita, ut audiretur sonus cum pontifex sanctuarium ingrederetur, ne forte moreretur. — 2. Ephod, id est superhumale, de quatuor coloribus auroque contextum, sine manicis ad modum calobii, habens aperturam in pectore quadram, in qua *logion*, seu rationale inserebatur. Super humeros infibulati erant auro duo lapides onychini in quibus duodecim nomina filiorum Israel erant insculpta. — 3. Logion, seu rationale quod pontifex ferebat in pectore habens duodecim lapides per ordines quatuor in quarum singulis scripta erant duodecim filiorum Israel nomina. In rationali quoque sculpta erant hæc duo verba: *Doctrina et veritas*. — 4. Capitis ornamentum erat cidaris habens circulum aureum cum malis granatis ac floribus. — 5. Lamina aurea supra frontem posita in qua erat scriptum sanctum Dei nomen tetragrammaton, Innocentius III, papa, CXIV-CXVII.

PARS SECUNDA.

Legalium indumentorum typica significatio.

Femoralia byssina terram figurabant quia byssus in

terra gignitur balleus, seu cingulum cum vittis circumvolutionem Oceani designabat. Tunica hyacinthina, ipso colore aera præferebat; per tintinnabula sonitus tonitruum indicabatur; per mala granata, coruscationes et feigura. Quatuor colores, quatuor elementa adumbrabant. — Ephod sua varietate cælum sidereum ostendebat; duo lapides onychini solem et lunam, vel duo hemisphæria denotabant duodecim gemmas, apostolos et duodecim signa Zodiaci præferebant. Rationale, rationem divinam qua omnia sunt plena, quaque terrena celestibus hærent. — Catene, unci, annuli, colligamenta elementorum et temporum signant. Cidaris, cælum empyreum. — lamina superposita, Deum omnibus præsentem; unde in Sapientia xvi, dicitur: *In veste potenter lotus erat orbis terrarum et parentum magnatium in quatuor ordinibus erant scripta, et magnificentia tua in diademate illius erat scripta.*

PARS QUARTA.

Quæ fuerint monachorum ac monialium vestes.

1. Cingulum, nam Monachus, ut bonus Christi miles, semper acinctus lumbis incedere debet.

2. Cucullus, vel cucullio, aut cuculla, caput et humeros ambiens et protegens, simplicitatis ac innocentie symbolum erat. In acumen desinebat, in hieme villosa, et inestate tenuis. Aliqui Ultramontani cucullum fœcum, vel fœcum appellant, habitum longum et amplum manicis carentem. Egyptii monachi cuculla induebantur utebantur, diebus ac noctibus, eratque persæpe cruce purpurea insignita.

Colobium quod dicebatur quoque libitosarium, vel levitourium, seu lebeton, vel lebiton, manicis eorum et quandam similitudinem cum tunicellis; mox albi coloris erat, modo vero, pulli, fusi aut nigri; mortificationem atque promptam ad omne bonum opus dispositionem indicabat.

4. Rebrachiatoris quæ succinctoris, redimicula et scapularis quoque vocabantur, erant quoddam scapulare ab humeris pendens sicut crucis jugum.

5. Mafors, sive mavors, alias maforte, vel marorte, et

in pueris maiores, erant angustum palliolum collum atque humeros tegens. Vilis erat pretii et humilitatem indicabat. Stola illud Græci vocabant, Latini vero ricinium, nil etiam humerale nuncupabant.

6. Planeta seu planica quæ in vestibus sacris alio nomine casula dicitur, quasi parva casa, quia totum hominem instar casæ antiquitus tangebant. Exstant etiam nunc in quibusdam monasteriis planeta ex omni parte rotunda totum hominem circumdantes.

7. Birrus seu byrrus censetur fuisse pallioli genus, ecclesiasticis et monachis olim usitatum. Nunc lineum, nunc vero sericum, et pretiosum erat.

Talis fuit antiquus episcoporum habitus: primo, vesti communis superinduebant lineam, seu lineum indumentum quod *rochetum* vocabant, dein vero solum tunicam manicatam, alio nomine *dalmaticam* ac denique palliolum breve humeros tantum et brachia tegens.

8. Ultimus habitus monachorum est *melos*, pellis caprina seu ovina quæ melotes vel pera appellatur. Erat vestis e pelle ovina vel caprina confecta quam gestant monachi ad imitationem eorum qui in Veteri Testamento vitam eremiticam agebant. A quibusdam penula, et ependytes vocabatur. A collo pendebat usque ad lumbos.

9. Baculum quoque portabant ad prophetarum imitationem, ut firmiter in via mandatorum Dei incederent.

10. Calceamenta; cum ista, veluti præcepto evangelico sibi interdicta arbitrantur, tantummodo caligis suos muniebant pedes, cum infirmitas corporis, vel hiemis maturus rigor, seu meridiani æstus fervor exigeret.

11. Cilicium, quoddam indumentum rigenti pilo, clavis, cuspidibus, horridum ad carnem macerandam aptatum. A sacco distinguebatur. Cassianus monachus, XLIX, 60-65.

Dentur ab abbate omnia quæ sunt necessaria, id est cuculla, tunica, pedales, caligæ, brachile, cultellus, graphium, acus, mappula, tabula, ut omnia auferatur necessitatis excusatio.

Cuculla debet esse villosa per hiemem et in æstate pura et velutis. — Scapulare, propter opera; erat apertum ex utroque latere; pars quæ ante et retro pendebat, usque ad talos pertinebat. — Indumenta pedum, pedales, et caligæ. — Stramenta lectorum sufficiant, matra, sagum, lena et capitale. — Cuculla quoque a sanctimonialibus gestabatur, et ea induti ad sacram communionem accedebant monachi, unde concludere licet illam postea totum corpus subtexisse; cappa etiam vocata est. — Itinerantes pro floccis, poterunt uti cappa rotunda, flocco breviori, ex utraque parte aperta, cui desuper assutum est caputium. Subtus vero cappam, scapulare deferant et capellum de filio, nigrum, non hirsutum sed planum. Juxta alios, habentibus annis, cuculla facta est vestis ampla, talaris, manicata, habens speciem crucis per quatuor partes extensam. — Flocus, vel iocus vocabatur quoque cuculla major, aliquando capitulo carens, aliquando vero, caputium habens. — Colobium tunica lineæ erat, perparvas habens manicas, ut indicaret vitam sine hypocrisi; a quibusdam cotardiæ vocabatur. — Coquinarii autem gestabant tunicas ex sacco, et cucullas ex segestri.

Benedictini monachi non utebantur camisiis vel interuliis, sed tantum ciliciis sicut et Carthusiani ac Cluniacenses, excepta infirmitatis causa, ubi stamineis utebantur. Aelredus tamen virginibus suis duas siopaceas camisiis, vel stamineas concessit.

Pedales quos S. Benedictus suis concessit erant calcei qui pedem tangebant et caligæ subalares, vel socci qui pedem non cooperiebant et ligabantur. — Tibiacum, tibiam induebat. — Ocreæ alti calcei erant et in lingua Teutonica botæ vocabantur. — Sandalia erant quoddam caligæ genus. — Aliquando clavate erant propter itineraria; in hieme vero, ligneæ et pellicæ. — Femoralia femora induebant. — Bracæ inferiorem corporis partem stringebant. — Fasciola erat quidam pars monachorum vestium. — Mannariola ac facitergia erant lineæ ad monachorum usus.

Hæc diversa vestimenta apud varios ordines varii coloris erant. Apud quosdam nigri coloris, apud quosdam vero, albi, apud alios autem, fuscii.

Candidum colorem deferunt cum Cisterciensibus, Camaldulensibus, Carthusienses, Cælestini et Olivetani; multaque sanctimonialia utebantur indumentis laicis et laticius.

Monachorum vestimenta, non nimis curta vel brevia erant, nec longiora, sed mensurata. Illud autem nimis curtum habebatur quod talum non attingit; longius vero, quod ad humum defluit et pulverem movet.

Quædam alia monachorum indumenta vocabantur:

sotularis, pellicia gemella, et nocturnalis. Alia quotannis dabantur, alia autem, singulis duobus annis, alia de triennio in triennium.

Monachorum capitis tegumentum vocabatur aliquando biretum.

Juxta quosdam, monachorum calcei crepidæ appellabantur, et in aliis regionibus vitronæ. Vantos, seu chirothecas ferebant in via. Benedictus monachus, LXVI, 72 seq.

Monachorum lectorum stramenta.

1. Matra, teges e juncis contexta; hanc solo substernebant monachi, hæc erat quotidianum scamnum, hæc culcitra, hæc plumella, hæc stragulum, hæc omnia lecti commoditas. Super matram dormiebant, imo super unam illius partem jacentes, altera corpus contegebant. Matra assidebant, ea pro sede utentes. In matra oraturi genuflectebant, super matram morituri deponebantur. Inde colligi licet matram esse stratum durum mortificationi aptum.

2. Sagum, erat stramentum, aut e grosso lino aut de cannabe factum et fere in modum sacci formatum et super matram positum, quod monachi pro lectisternio habebant. Recentiori vero sensu, sagum illud est quod continet vel paleas vel fenum. Sagellum quoque vocabatur. Intelligi etiam potest, gallico sensu, *une grosse serge velue à mettre sur le materas*.

3. Lena, toga duplex, species vestis villosa quam nos toxam, alii vero galnapem, aut galbanem vocant, seu stragulum villosum ad repellendum frigus aptum.

4. Capitale, est cervical, lana, paleis, aut plumis plenum, quod nos plumacium dicitur. Hæc quidem stramenta, S. Benedictus fratribus induisit.

5. Pachomius, a Cælo monitus, jussit suos monachos dormire sedentes in sedibus supinioribus, superjectis stragulis.

De regula Isidori, monachorum stratus erat storra, seu teges, stragulum, pellesque laute dux, galnabis quoque et fecis tergium geminusque ad caput pulvinus.

Brachille existimatur a quibusdam esse orachiorum indumentum; illud reddit in versione sua Gallica Juvénalis: *Manche, manchon*. Verisimilius autem haberi potest pro cingulo, vel zona qua brachia ligantur. Graphium, stylus erat quo monachi in cera scribebant.

Mappola est sudarium ad tergendum nasum aptum.

Mensuræ sunt pugilares in quibus scribebatur. Benedictus monachus, LXVI, 792 seq.

Vestimenta alio colore non induant monachi nisi lila, lactina, aut nigra nativa. S. Aurelianus, Arelatensis episc., LXVIII, 391.

Tertullianus, l. 1, 1303.

Lumina lapillorum quibus monilia variantur, circulos ex auro quo brachia arcantur; medicamenta ex fuso quibus lanæ colorantur, et illum nigrum pulverem quo oculorum exordia producantur, *ibid.*, 1306.

MONITUM.

In isto indice non tantum præsto sunt quæ litteratorum auribus minus recte sonant, sive ob syntaxis negligentiam et sensus obcuritatem, sive ob quorundam locutionum usum insoletum et ipsius, ut aiunt, barbariam, sed etiam quæ feliciter unuscujusque invenit ingenium. Profecto enim absurda est, etsi vulgo accepta, opinio eorum qui ut fastidiosa et stomacho repugnantia quælibet mediæ ævi scripta respuunt. Factum hoc, ut apud Cæc. Sedulium notamus, nonnisi impiorum est hominum, quo obtineant ut negligenter antiquitatis studium: et quod triste est dictum, diutius nimium prævaluit ipsorum perversitas. Latinitas eo ipso quo ima seu infima dicatur non est ideo contemnenda, sed e contra studii cujusdam accuratioris causa efficitur. Veterum Romanorum idiomatis fortuna atque imperii eadem esse debuit, præda scilicet victorum: hic incepit longævus iste parturitionis labor ex quo ortæ sunt non subito sed gradatim recentiorum linguæ baptismo scripturarum ex integro imbutæ: et quis in dubium audeat revocare quin sibi mirabiliter unaquæque lingua tantas opes vindicaverit? Deus ille Moyses, Christus iste Apostolorum cum suis angelis et sua dilectissima Ecclesia, deos et deas ex toto Olympo detrudit, et ubique per orbem terrarum prædicatus, linguam linguæ substituit juxta cujusque gentis morem et ingenium. Quidquid ergo missitent antiquarum fabularum jactatores, grandia et pulcherrima ora sunt ex mediæ ævi elaboratione, linguarum tyronibus summe commendanda. Inter mille et milia neologismorum exempla quid auribus poetæ delicatissimis dulcius resonare possit quam hæc nunc tam trita: *Notre-Dame, ton Bon Ange, mon Clocher, la douce Providence, un beau Dimanche, les Saints Auteurs, la*

croix de Pierre, etc., etc. Et hæc non tantum Gallice dico, sed et Germanice, Anglice, Hispanice, Italice. Aliunde quot voces minus honestæ nequidem tolerantur Christianis auribus et e lingua radiantur. Igitur lector sedulo meminerit, quemque auctorem etiam infusæ Latinitatis suos habuisse archaismos et sibi proprium leporem: sed si aliquando barbaras voces adhibueris eo quod verbis propriis sæpissime res novæ indigerent, hoc egit, vel ut facilius a lectoribus intelligeretur quibus ipse Latinus scriptor barbarus videbatur.

Ratio ordinis quem secuti sumus hæc est. Primum necesse credidimus unicuique auctori relinquere quæ sua sunt, ut inde difficilior gigneretur confusio. Ita vero quasi quoddam leve speculum ante oculos exponitur, cuius species et forma homogeneitatis suæ et unitatis servat characterem. Ad calcem indicis habet omnium auctorum seriem, cuius auxilio facilis est quælibet inquisitio, ratione habita, et chronologica temporum quam accurate notavimus, et ordinis tomorum *Novi Cursus Patrologiæ*. Præterea omnes auctores in eodem chronologico ordine largimur quo occurrunt in Novo Cursu: sed quod unicuique proprium est duplici parte distinguimus, videlicet dialectica et grammaticalis, quæ de linguis in genere aut etiam de lingua specialiter disserit, et diacritica, quæ de voce et verbis disputat. In priori inseruntur quæ soni, vocis, verborum, sermonis et scripturæ originem et usum respiciunt, sicut et grammaticæ utilitates et leges, item humani ingenii studia et labores quibus scripta de lingua in aliam linguam transiere. In posteriori vero parte disponuntur ordine alphabeti voces et locutiones notatu dignæ, in tot categoriis quot linguae. Tres vulgo statuuntur, nempe, Hebrææ voces, Græcæ et Latinæ.

N. B. Romanus numerus dat tomum *Novi Cursus Patrologiæ*, columnam autem arabicam; ad Romanum ultimum citatum recurras quoties deficiit.

DRACONTIUS, litterarius vir et poeta. — Quod hoc Dracontii tempore adhuc vigeant bonæ litteræ, et Latinitatis non contemnendæ peculiaris quidam gustus præsertim in poetis supererat, LX, 600. Scriptoris Dracontii expurgationes, 601 et seqq. A S. Columbano laudatur, 605. S. Ildelfonsi sententia de Dracontii operibus a S. Engenio emendatis, 615. Diversæ de eo opiniones, 615 et seqq. Quid sentiant de ejus Latinitate Dupinius, Cellerius, Goldastus, Fabricius, Barthius, 668. Quod attinet ad sermonis Latini nitorem multa occurrunt in Dracontio pure et venuste dicta, quædam autem minus condita et imitationi non proponenda, 670. Qui sermonis Latini terminos nosse volunt poetas quales Dracontium non ignorare debent, cum illi plurima et pura Latinitate vocabula nobis servaverint et quædam nova non semper abiicienda invenerunt, *ibid.* Satis erit, post moram in Prudentii opera, memorare de Dracontio: 1° Quod in libris *De Deo* utitur de adverbis *renerantur* ut Tertullianus, *moderanter* *dominanter*, *tonanter*, *trementer*, 670. 2° Nomine *modestus* delectatur hic poeta, *ibid.* 3° Sæpe adjectivum *anhelus* igni aut soli tribuit, *ibid.* 4° Animadvertit Veitizius bina epitheta seu adjectiva a Dracontio sæpe uniri uni substantivo, 671. 5° Raro a metri legibus recedit, *ibid.* PAULINUS (*). — Nolanus episc. — Ausonius, egregium in litteris magistrum, poetica et oratoria facultate inclytum habuit Paulinus, LXI, 19. Paulinus omnia Ausonio debere fatetur, *ibid.* In homilia de eleemosyna magis fulget stylus Paulini, cujus eloquentiam, nobilitatem, et indolem commendaverunt S. Ambrosius, Idatius, Encheirus, Hieronymus, 19, 20. Etsi eum in litteris Græcis peritum habuerit Hieronymus, videtur tamen mediocriter in Græco sermone fuisse instructum, 21.

De lingua Hebræica. — Scriptura sacra ab una lingua perfecta opportune potuit per orbem terrarum disseminari; per varias interpretum linguas longe lateque diffusa est, CVII, 880. In Scriptura ita obscure dicta sunt quædam, ut densissimam caliginem obducant, *ibid.* Nulla sana erat magis mandanda memoria, quam illa verborum locutionumque genera quæ ignoramus, 585. Debet autem studere is qui propriorum signorum peritus esse vult, quantum ad sermones pertinet, ut et certam cognoscat vim verborum, et proprium sciat modum locutionis, 586. Probabile est quod in familia Hebræ ex quo Hebræi dicti sunt permanserit lingua quæ primitus Adam data fuit, 580. Quod in linguarum divisione nihil novi condidit creator, sed tantum dicendi modos et formas in diversis loquelarum generibus divisit, *ibid.*; CXI, 455. Lingua Hebræa usi sunt patriarchæ et prophætæ, *ibid.* Prima est linguarum sanctorum, *ibid.* Arbitrantur quidam linguam Hebræam ipsam esse Chaldaicam, quia Abraham de Chaldaea fuit; sed errant eo quod legitur tres pueri Hebræi et quibus Daniel unus erat, didicisse linguam quam non noverant, scilicet Chaldaeorum, 456. Omnes orientales in gutture linguam et verba collidunt, sicut Hebræi et Syri, *ibid.* Occidentales autem verba in dentibus frangunt, sicut Itali et Hispani, *ibid.* Syrus et Chaldaeus vicinus Hebræo est sermone, consonans in plerisque, ut litterarum sonus, *ibid.* Litterarum Hebræarum interpretatio, 1185.

INDEX DIRECTIVUS

CUJUSQUE LECTORIS STUDIOSI SCIENTIÆ PATRISTICÆ,

IN SINGULA DOCTRINÆ CATHOLICÆ PLACITA, SIVE AD RECTÆ FIDEI DEPOSITUM CUSTODIENDUM
CONTRA HÆRETICORUM VENENATA DOGMATA VIRES ATQUE ARMA SUPPEDITENT,
VEL AD RECTAM VIVENDI RATIONEM SAPIENTER INSTITUENDAM MAXIMO SINT ADJUMENTO,
DENIQUE GENEROSIS AC BENE NATIS INGENIIS ERUDITIONIS AC SCIENTIÆ PLURIMUM CONFERANT.

MONITUM.

Index iste differt ab analytico in eo quod non omnes Patrologiæ res afferat, sed tantum præcipuas, et sub alio modo. Ideo nedum sit repetitio, tempore carentes multum adjuvabit; et si quid illis deest, hoc in indicia ejusdem generis fusius tractato brevi tempore invenient. Insuper plura in indice *gigante* ommissa, aut sub respectu novo tractata felicissime eis occurrent.

LECTORI BENEVOLO.

Si quem dura manet sententia iudicis olim,
Damastrum ærumnis supplicisque caput;
Hunc neque fibrili læsant ergastula massa,
Nec rigida vexant fossa metalla manu:
Lexica contextat; nam cætera quid moror? omnes
Pœnarum facies hic labor unus habet.
(SCALIGER.)

Quæquam quæ multa passim ac luculenter dicta scriptave fuerunt a clarissimo et eminentissimo viro J. P. Migne, me præfandi onere maxima ex parte levent; quædam tamen superesse video de quibus lectorem, in ipso statim aditu, præmonitum fuisse non pigeat. Instituti enim mei ratio reddenda est. Quod paucis, Deo juvante, absolvam.

Ante igitur quam me incuses, optime lector, legito quæ subsunt et attendito quænam quærentur dicantur.

Ac primum quidem, ut cuius rei gratia hanc ego laborum molem susceperim atque sim aggressus, moneam; ea mihi mens fuit ut eo libentius quo facilius illos sanctorum Patrum solus nocturna diurnæque manu versares. Cum enim sint sane omnia ista, quæ a tot et tantis ecclesiarum magistris postori-

tati relicta sunt litterarum monumenta, utilia in primis atque insignia; ejusmodi insuper sunt ut vel ad rectæ fidelis depositum custodiendum contra hæreticorum venenata dogmata vires atque arma suppeditent; vel ad rectam vivendi rationem sapienter instituendam maximo sint adjumento; denique generosis ac bene natis ingeniis eruditionis ac scientiæ plurimum conferant. At vero in tanta rerum farragine, qui non detineretur aut deleretur quisquis indagandum sibi aliquid constituisset, nisi ad manum quodam modo deductus procederet, indice quovis monstrante viam?

Ego igitur, Deum propitium fore credens, ad hoc opus me accinxī, in hoc laborem contuli, huic operi insudavi, ut videlicet hunc illum indicem, quo uterentur omnes ad omnimodas quæstiones, compingerem. Quod si vero e sententia successerit, bene positam operam studiosi sponte affirmabunt; nec tanti est ut illud tam immensum opus, quo tandem pacto perfecerim, etiam paucis exponam: noverint qui ausi idem, sudarint multum, frustra que laborarint.

Index porro quilibet ad id potissimum, ni fallor, conficitur ut indicet, non autem ut ostendat ac quasi representet ea ipsa quæ exquiruntur. Res est plana, ut arbitror, et per se conspicua. Licuit igitur mihi, quin et decuit intra certos restrictosque limites contineri. Aliter siquidem, ut ait poeta notissimus:

Longa forent fastidia, longæ
Ambages; sed summa sequor fastigia rerum.
(Æneid., I, 515, 516.)

Et ideo cum veluti fortim raptimque summaria quæque rerum capita indicentur, raro admodum erant negligenda tibi vel levissima indicia. Sæpe enim sæpius paucissimis verbis indicata invenies quæ per multas exiunt paginas, in textu Patrum, large et copiose decurrant. Originem ego, ut exemplis utar, caputque fluminis ostendi indigitans; tu prono deinde cursu declivique, obliquas, si libuerit, æqueris ripas, ut ad ostia tandem ora que devenire contingat. Numquid enim, amabo te, singula singulis, ac proinde ad fastidium usque ac nauseam, numeris indicanda fuisse censes? Quorum hæc, cedo, quandoquidem semper, at nunc præcipue, intelligenti cuilibet parca satis futura fuerint? Reque apse, cum instituitur ab auctore aliquo tractatus quisvis de hoc vel illo argumento, integrum, opinor, tractatum summam et quasi obiter legenti indicasse muneris mei est, at non quæcunque capita singulatim; quæ tu quidem videbis ipse et requires, si cautus ac vigil animum advertas. Quæ vero huic eidem tractatui quasi fortuito casu interserta intermixta exciderint, hæc præterire atque omittere summa ravi diligentia, cum meæ non tuæ partes fuerint illa eadem indagare atque investigare. Pace igitur tua dixerim, me brevitati operis simul ac veræ lectoris utilitati consultum provisumque voluisse et invigilasse. Nunc cum Propertio dicam:

Quod si delinierint vires, audacia certe
Laus erit; in magnis, et voluisse sat est

Ita autem huncce ego Indicem compegi et ordinavi, non ut a legendorum Patrum necessitate eximaris, quod me et te, amice lector, certo certius pueret; sed ut per te ipsum deque visu, ut aiant, eorumdem scripta pura puta ipsa pernosceres ac propriis penitus medullitiusque inspiceres atque perlustrares oculis. Inde etiam est quod multa in dubiam, seu in ambiguum formam, ex industria, retulerim, quæ cæteroquin ex ac indubia prorsus atque omnino inconcussa remaneant.

Haud tamen indicias iverim me plura interdum consulto transiisse, propterea scilicet quod ad Indicem Scripturarum reapsius (des veniam verbo) pertinerent. Peculiarem vero, hoc advertas velim, propriis, ut vocant, nominibus curam, ne dicam sollicitudinem impendi et adhibui, ratus videlicet illuc quærenda ut plurimum emuncare naris indagatoribus quæ ipsis opus forent.

Cæterum nullus dubito quin, qui plura voluerit, ad ipsos ipsorum peculiare Patrum ac Scriptorum Indices, ubi non desunt, sedulo recurat; qui quidem cum sint singuli locupletes admodum, amplissimam certe, non dico messem modo, sed farragine rerum subministrant; quam mihi, generali a quæque notando, delibare tantum ac veluti perstringere meus fuit ac propositum. Quod quomodo sim assecutus, non meum est, etsi omnium, dispicere.

At ne in immensum crescant nostra hæc monita, illud te, lector amantissime, rogatum ac monitum velim, ut, si quid occurrerit a me prætermisum, ne prius mihi vitio veritas quam quæ sententia proxima sat, apprimè consulueris, ubi spero equidem fortasse an repertum iri quicquid in istis desiderabitur.

Quod sigla, seu mavis sigilla, hoc unum moneo: tribus auctoribus, Augustino scilicet, Hieronymo et Ambrosio, propter principalem auctoritatem, necnon et interdum Tertulliano, propriam institui nominationem ac designationem; cæteris vero non ita.

His igitur breviter præmissis, opto, candide lector, ut valeas et mihi bona preceris.

Scribebam apud Durocasses, in diocesi Carnotensi, sexto Kalendas Octobris, ann. R. S. 1863.
